DR. A. S. EVE LECTURES TO GRADUATES

Meeting of Ottawa Valley
Graduates Society
DR. SMALL RESIGNS

Scholarships, Entrance Qualifications, and Extension Courses Discussed

Announcement that McGill University was willing to provide extension courses for university graduates and undergraduates in Ottawa, a recommendation that McGill accept the Bachelor of Arts degree of other universities as full qualification for the medical course and an address of much charm by Dr. A. S. Eve, MacDonald professor of physics at McGill were features of the meeting in the Chateau Laurier of the Ottawa Valley Graduates Society of McGill. Dr. Eve spoke on Sir Ernest Rutherford, his predecessor in the chair at McGill, and his remarkable experiments showing the radioactivity of atoms.

Mr. J. B. McRae was appointed president, succeeding Dr. H. B. Small, whose retirement was accepted with regret.

Appreciation of the P. S. Ross \$100 scholarship for McGill matriculation students, presented by Mr. P. D. Ross, was expressed. This year the scholarship is for the junior matriculation student in the Ottawa Valley having the highest marks, conditional upon attendance at McGill the following term. The Graduates' Society gives a \$75 scholarship to the student coming second.

Dr. H. B. Small presided until the election of officers during which Mr. P. D. Ross took the chair. In his report the secretary-treasurer Mr. R. C. Berry, said 200 graduates belonged to the society, which closed the year with a satisfactory surplus.

Dr. W. Bell Dawson, representative to the graduates' council, called attention to the need for extension courses, and the probability of their establishment so that men might be brought up to date in their special professions. He recommended and the clause was adopted, that McGill recognize the Bachelor of Arts degree of other universities at its full value in a medical course, as Harvard did in the United States.

At present it was pointed out, it took a B. A. student from Acadia University five years for a medical course, and seven years in McGill. For this reason Maritime students were going to the United States. Dr. Dawson expressed the opinion that (Continued on page three).

SUDDEN DEATH OF ARTHUR KIRSHBERG

Carbuncle Causes Blood-Poisoning and Death

The funeral of the late Arthur Kirshberg, class of 1924 Electrical Engineering took place yesterday afternoon at two-thirty from his home 1025 Tupper St. His untimely departure was a severe blow not only to his parents and near kin but also to his friends and classmates with whom he had been closely associated. It was his quiet and unassuming attitude, his wit and sense of humor, and his devotion and love for his friends that made him so popular.

He died as a result of a septicemia or blood-poisoning due to a carbuncle on the back of his neck. The infection took a vicious turn last Monday when he was sent to the Ross Memorial, and on Friday morning at eight o'clock he came to his untimely end at the age of twenty-one.

Arthur Kirshberg was a member of the McGill and M. A. A. A. Figure Skating Clubs. As a result of his fervor for all things scientific he became a member of the Science and Electrical Clubs. He was connected also with the McGill Macbean Society and was a member of the Zeta Beta Law Fraternity.

The funeral was well attended. Representatives of the McGill Undergraduate Society, the class of 1924 and the Electrical Club as well as Professors Herdt, Chrystie and Armstrong paid their last respects. The members of his and other fraternities also paid homage to their beloved brother and friend. Floral tributes were received from the aforementioned.

The entire McGill student body and faculty extend their sympathy to the bereaved and share their sorrow.

WHAT'S ON

TO-DAY

5.00 p.m.—Annual Board Meeting.
5.00 p.m.—Intermediate and Senior Hockey Practice.

STRATHCONA HALL MENACED BY FLAMES

But the Amateur Fire
Brigade
PUT IT OUT

And Their Happy Home Still Has a Roof

Last Wednesday afternoon those fortunate students who happened to be in Strathcona Hall were treated to some excitement in the shape of a fire on the first residential floor. Great volumes of smoke were seen issuing from the janitor's room by Fraser who raised the alarm and the impromptu fire brigade did prodigious acts of valour. Frank Emmons worked in the end of the nozzle and played a grand stream of water through the door. The crowd which stood in the landing was ankle deep in water. The office boy sent in an alarm to the Fire Department.

At this point the top floor came to the rescue with a hose with Schlifer at the nozzle. Some enthusiastic amateur fireman turned on the water and the stream caught the crowd on the landing. Chevin bearing the brunt of the onslaught, O'Donnell (the Hockey player who up to this point had been sleeping in his room) woke up and ran out on the landing and slipped and sat in the water.

Outside the Fire Department responded nobly and to such good effect that Sherbrooke Street between the Union and the Maxwellton Apartment House was filled with engines, hose wagons, and hook and ladder wagons. A large crowd collected and expectedly watched for the flames to break out through the storm windows. By this time the spectators and the fire apparatus on the street was more interesting than the fire and the favoured few took points of vantage to watch the scene below.

The firemen arrived and took charge of the proceedings and the Captain when he saw the work of the student brigade was heard to remark in a disgusted voice what sounded like, "Vierge, ang' ca!" The professionalists started to work and swept up the water spread by the amateurs laid the hose out to dry.

(Continued on Page Two)

NEWS BOARD

A meeting of the News Board of the McGill Daily will be held this evening at seven o'clock. The News Board photograph will be taken to-morrow at one o'clock at Netman's.

MUCH WORK BEING DONE ON ANNUAL

Subscription Lists Are Being Circulated Again

IMPROVEMENTS

Group Pictures Must be in Before End of Week

This year's issue of the Annual will be a bumper-number according to the Board who have been working steadily on the publication for the past two months. The contract has been awarded to Southam Press Limited who have promised to bring this year's Annual up to the high standard set by previous issues. "We are going to do all that is in our power to exceed previous issues," said one prominent member of that firm.

The Board is now ready to receive all write-ups, and executives are strongly urged to see that these are completed and handed in before the close of the present week. Classifying and arranging these write-ups involves a good deal of work, pointed out a member of the Board, and if an early publication of the Annual is desired by the student body they must aid in every way possible.

A number of group pictures have not as yet been taken. These must be in the hands of the Board before this Saturday. Executives who the Board have been unable to notify are asked to make arrangements with Mr. Notman. The competition for snapshots also closes this week. All those who desire to submit any snapshots with a view to obtaining the prize of a free copy of the Annual must have these in before the end of the week.

It has been decided to send out the subscription lists again as many men have not a chance to sign these since they were circulated just before the Christmas holidays and many men were out of town at the time. This will give men who were away a chance to secure their copy of the Annual.

No immediate financial embarrassment will be suffered by those who desire a copy of the Annual. The system that made itself so popular last year will obtain again this session. The sum of three dollars and seventy five cents will be deducted from the caution money of those placing their names on the subscription lists.

There will be many improvements in this year's Annual according to announcement made by the Board.

The following group pictures must be taken by the end of the week: Arts, '27 Comm, '27 Med, '27, Dent, '24.

(Continued on Page Two)

HISTORICAL CLUB TO-NIGHT AT 8 P.M.

Subject "The Immigration Problem in Canada"

The sixth meeting of the Historical Club will take place to-morrow evening at eight o'clock at the residence of the Founder of the Club, Dr. Charles W. Colby, 560 Pine Avenue West. Two vitally important questions will form the basis of discussion. G. Campbell Wadsworth, B. A., of the Graduate School, will treat "The Immigration Problem in Canada".

The speaker has spent several summers in the West, living among "New Canadians" of numerous nationalities, and his paper is certain to be replete with much first-hand information. The immigration problem is the greatest facing the Dominion to-day. G. C. Wadsworth will trace the history of Canadian immigration, but the main part of his address will be devoted to the problems of distribution and assimilation.

The second speaker will be F. G. Ross, honour student in Arts '25, who will deliver a discourse on "Canada and the Imperial Conference." Ross will deal especially with the recent Imperial Conference but will also sketch its evolution since the inception of the first "Colonial Conference" in 1887. In view of the recent discussions regarding preference and protection which will unfortunately for Canada be shelved by the incoming Labour Government in Great Britain, the question of the Imperial Conference, and its merits and demerits should provide ample material for discussion.

The members of the Club feel it is a very great honour to meet at the residence of Dr. Colby who founded the club twenty-nine years ago. Dr. (Continued on page four)

MONTREAL, MONDAY, JANUARY 21, 1924

THE SECOND TERM

The first term is over and after a week of examinations—a period of nightmares for some—the university has entered upon the second half of the session. To-day our mind turns toward the three and a half months and we take a cursory glance over the happenings in that interval of time and find that there are some reasons for self-congratulations and some for self-criticism. This is true of athletics, of undergraduate activities and of university life in general. For after all nothing is perfect.

In the world of sports the senior rugby men made a great finish and brought McGill into the top ranks. Critics were confounded and the prospects are good for the coming season. Track men and tennis stars were successful in retaining their championship titles but the former will have to be careful and strengthen their ranks as much as possible, for the Toronto cinder men have set their gaze on the silverware and even now are hard at work preparing for the autumn competitions. The harriers, following the precedent of the past few years, again lost and it is high time that the undergraduates bolstered up this sport if McGill is to do anything on the long distance work. All honour to those who did turn out but unless a greater degree of popularity is attained this sport is threatened with an early death. See to it that it does not die.

In undergraduate life the freshmen and sophomores are reminded that the initiation ceremonies did not reflect any great glory upon the participating parties. Rules were set down and not carried out. Plans were formulated and went awry. And the ceremonies approached the borders of the farcical. Let the present freshman year bear this in mind and when the autumn comes we sincerely hope that an entirely satisfactory mode of initiation will be inaugurated. If such a thing is possible.

The students, we think, should also be reminded that certain activities have not received all the attention of which they were worthy. The meeting of the Students' Society, though featured by enthusiasm and fine reports, was not attended by a thousand undergraduates and we should whisper in the ears of those who did not show enough interest to be present, to go to the next meeting, or to forever keep their criticisms to themselves. The Union, especially the cafeteria, has been fairly well patronized but the lower years have not developed the habit of giving their first attention to their own institutions and the time has arrived when realization should dawn upon them and they should use common sense.

And finally, we fear that there are some students who realized too late the purposes for which they came to college and in consequence suffered an unhappy fate last week. After all we came here to add to our knowledge and if this has not been done, those who will be asked to leave during the next few days have no one to blame except themselves. Those who experienced all the sensations which go with narrow escapes will do well if they benefit from the mid-term feelings.

But to-day we also look forward through the next few months before the terminations of the session. Several athletic titles hang in the balance and we hope that fortune will smile upon the sons of old McGill.

In other spheres of work there is much to be done and the grand climax will be reached when the final examination papers are presented to those, who will be supposed to possess sufficient knowledge to please the examiner. Let us get together and by active co-operation and friendly aid make the second term a success, free as far as possible from failures and disappointments.

It is easy enough to make a good start but only those who have wisdom, who are in good training, and who have practised, finish well. We start the new term to-day. What about the finish?

FREE DIABETIC CLINIC

Dr. William J. Pulley, Clinical Professor of Medicine in New York University, will be in direct charge of a free diabetic clinic to be established in the outpatient department of the New York University Medical School the early part of January. Dr. Pulley will be assisted by twelve instructors from the Medical School, with a nurse and a technician.

Besides offering free treatment to persons suffering from Diabetes Mellitus, the clinic will be operated for the instruction of students and doctors in the proper administration of Insulin.

The recovery ward will be at the disposal of those patients who prefer to take their three day rest period away from home. This enforced rest in bed is required of every person prior to the use of Insulin. At the same time a regulated diet is prescribed in order to determine the sugar tolerance of the individual.

The administration of Insulin without charge was made possible through the efforts of Dr. Pulley who personally collected sufficient funds for this purpose. Although the price has been materially reduced, the cost of the drug is still a considerable item in view of the fact that it must be administered very frequently in most cases according to Dr. Pulley.

STRATHCONA HALL MENACED BY FLAMES

(Continued from Page One)
The damage consisted of one umbrella burned but the handle still serviceable, three window blind rollers, one suit of underwear burned, owner not ascertained, two drawers (of a cupboard) filled with water. By this time the most of the fire apparatus had gone home and the fire being out the ring-side spectators dispersed to their rooms in continuous studying for their examinations.

—Extend to the Union for Use.

NOTICES

ANNUAL WRITE-UPS

All write-ups for the Annual should be in by the end of this week. The managers of all teams, secretaries and scribes of clubs are responsible for these write-ups and should get them into the hands of the Annual Board immediately.

INTERMEDIATE HOCKEY PRACTICE

Intermediate players practice against the seniors tonight from 5 to 6 on account of the professional game, instead of 6 to 7. The following players please report: Routledge, McGregor, Deacon, Kelly, De Haire, Lynch, Thompson, Pinky, and Bartlett.

HOCKEY

Attendance in the Department of Physical Education will be given for hockey. Attendance sheets may be obtained from Joe at the McTavish St. Rink Shack or at the office of the Secretary, Meison Hall.

ANNUAL BOARD MEETING

There will be an important meeting of the Annual Board to-day at 5 p.m. Everyone must be present.

S. C. A. MONTHLY MEETING

The monthly meeting of the S.C.A. will take place on Thursday, Jan. 24, at 7:30 p.m.

RADIO ASSOCIATION

The first meeting of the year will be held to-day in the Physics Building at 5 p.m. Instruction in the code will be given to all interested.

ELECTRICIANS

All men going on the "Ottawa trip" must hand in their ticket money (\$20 per person) to Borden '24, or Sharpe '23 today if possible and not later than noon tomorrow, in order that Dr. Herd may secure reservations.

GROUP PICTURES NOT TAKEN

The following group pictures for the Annual have not yet been taken. These must be taken at the first opportunity. The Board may be unable to get in touch with every executive and desire that those responsible on each of the following executives will make arrangements with Mr. Notman to be taken at once.
Arts '27, Med. '27, Dents. '24, R.V.C. Basketball, R.V.C. Hockey, M.S.P.E. Basketball, M.S.P.E. Hockey, Senior Basketball, Intermediate Basketball teams, Junior Basketball team, Intermediate Hockey, Junior Hockey, Tennis Team, Junior Prom Committee, B. W. & F. Club, Gymnastic Club, Ski and Snowshoe Club, Swimming and Water Polo, Students' Council, Union House Committee, Daily News Board, Literary and Debating Club, Canadian Club, Glee Club, Newfoundland Club, American Club, Ontario Club, Old Scouts Club, Columbian Club.

Write-ups for these should be in by the end of this week.

ANNUAL WRITE-UPS

All write-ups of clubs, teams and events which have not yet been handed in to the Annual Board by those responsible must hand them in by the end of the week.

C.O.T.C. SMOKER

There will be a smoking concert in the Union at 8 p.m. Monday, January 21st, during which the remaining certificates, obtained last session, will be distributed. The schemes for Artillery and other training will be outlined during the evening, and it will be regarded as a parade.

LECTURES AT P. C.

Prof. Yohan Maith of the Malva Theological Seminary, Indore, India, will give a series of lectures in the Presbyterian College, 67 McTavish St., as follows:—

Monday, Jan. 21—"India and Her Peoples."

Tuesday, Jan. 22—"The Soul of India."

Wednesday, Jan. 23—"The Women of India."

Thursday, Jan. 24—"Dawn in India" (Beginnings and Progress of Christianity.)

Friday, Jan. 25—"National Awakening in India" (The Political Situation.)

Attendance for credit in the Department of Physical Education will be given to 1st and 2nd year students who register each period on Mount Royal.

L. B. Hawley, Medicine II, has been appointed to take attendance of students and will be located at West end of Central Lookout each day (except Sunday) from 4 till 5:30 p.m., for this purpose.

CITY & DISTRICT HOCKEY LEAGUE

Jan. 24—McGill vs. M.A.A.A.

Jan. 31—Shamrocks vs. McGill

Feb. 7—St. Lambert vs. McGill

Feb. 21—McGill vs. St. Annes

Feb. 28—McGill vs. M.A.A.A.

March 6—McGill vs. Shamrocks.

MEDICAL SOCIETY

The Medical Undergraduates' Society will meet in the Assembly Hall of the New Medical Building tonight, Jan. 21st, at 8:15 p.m. Case reports will be discussed.

UNIVERSITY SERVICE

There will be a University Service next Sunday at 11 a.m. Further announcement will be given later.

WRESTLERS' ATTENTION

Will the following students who won medals in a recent Wrestling competition please attend a meeting at 8:30 on Monday, January 21st at the Central Y.M.C.A. when the medals will be presented:
Messrs. Phelps, Silver, Friedman, Rumpel and Copple.

ROOTERS BAND

Unfortunately the music room cannot be obtained for a practice originally called for to-day but a practice of the band will be held at 5:00 o'clock tomorrow (Tuesday) in the Union. All members of the band that were not out for the Varsity match please phone Bob Logan either at West, 797 or Plat. 474 if they intend turning out as tickets will be procured for them. This practice is being held in preparation for the McGill-U. of M. match on Wednesday next.

SENIOR YEARS—BASKETBALL

There will be held in the reading room of the Union at 8:15 on Thursday, a meeting between Coach Van Wagner and representatives of all Senior and Junior years, wishing to enter teams in interclass basketball. All years must have a representative at the meeting or see Mr. Van Wagner first. Practice hours will be assigned. A "knock-out" schedule will begin about the first week in February.

BASKETBALL SCHEDULE

Schedule for games left over or postponed from Freshman-Sophomore Basketball schedule.
Wed, Jan. 23.
6:30—Arts II vs. Theo. I
7:15—Dent. II vs. Med. II.
Fri Jan. 25.
6:30—Com. I vs. Dent. I
7:15—Com. II vs. Sci. II
Sat. Jan. 26.
2:30—Pharm. I vs. Med. I
3:15—Dent. I vs. Arts I
4:00—Med. II vs. Arts II
Mon. Jan. 28.
6:30—Dent. II vs. Sci. II.
7:15—Com. I vs. Pharm. I.
Wed, Jan. 30.
6:30—Dent. II vs. Theo. I.
7:15—Science vs. Dent. I
Fri. Feb. 1.
6:30—Med. II vs. Theo. I
7:15—Pharm. I vs. Arts I.

Managers, please note: There will be no further change in play games postponed from this scale on account of incomplete training.

All practice hours have been cancelled. Teams wanting practice hours see Mr. Van Wagner. Teams finding above schedule unsuitable please see Interfaculty B. B. Manager or Coach at once.

CHANGE OF DATE

Special notice is hereby given to members of McGill Fencing Club. Practices for which attendance will be given will now be held on Tuesdays and Thursdays, instead of Mondays and Thursdays as was the custom. There is locker accommodation for practically all the club. You are urged to come and practice diligently in support of our attempts to pick a good team for the coming Assault.

Saturday afternoon will always be used for extra practices, pools and other club activities.

GLEBE CLUB—ALL UP

Everybody out on time tonight, 7 o'clock sharp. Very important practice. Don't forget your music and bring along that new member. A cordial invitation is extended to all students who are interested in singing to come along and try out.

S.C.A. of R.V.C.

There will be a general meeting of the S.C.A. on Thursday, Jan. 24th at 1 p.m. in the Common Room. Reports of the Indianapolis Convention will be given by those who were there. Everyone interested is invited. Tea will be served.

R. V. C. '25

There will be a Class meeting, Monday, Jan. 21st, at 1 p.m. in room 2, R. V. C. The business will be the election of class debaters.

R. V. C. HOCKEY

There will be a practice on Monday from 5—6 for year IV, III, II. Year I will practice Tuesday Morning from 9—11.

R. V. C. BASKETBALL

There will be a practice in the girls gym, of the Montreal High on Tuesday at 5:45 p.m. This is the last practice before the match against Macdonald College on Thursday, so a large turn-out is expected.

The lectures will be broadcast by

TO DISCUSS BUSH FIRE PREVENTION

Open Meeting to be Held by Society of Chemical Industry

CHEMISTRY BUILDING

Lectures to be Broadcast by General Electric Company

A meeting of the Society of Chemical Industry will be held to-night at 8:15 in the Lecture Theatre of the Chemistry and Mining Building, which will consist of a symposium of Forest Fire Prevention. The meeting which is a public one to which all students of the university are cordially invited, is under the auspices of the Montreal Section of the Society of Chemical Industry. The speakers of the evening will be Mr. Ellwood Wilson, Manager Forest Division of Laurentide Pulp and Paper Co., Grandmère, Mr. Robson Black, Manager Canadian Forestry Association, Ottawa, and Dr. R. E. Ruttan, Director of the Department of Chemistry and member of Honorary Council of Scientific Research.

Messrs Wilson and Black are authorities on the subject of forest fire prevention, and their practical experience makes them competent to demonstrate the needs and methods of fire control in an able and interesting manner. Dr. Ruttan who needs no introduction to the students of the university, is a scientist of distinction and lecturer of charm. These men will discuss in a general way the losses due to the ravages of forest fires, and the problems met with in their prevention, and their remarks should be of especial interest to those connected with hydro electric industries, pulp and paper manufacture, and in industries in which wood is utilized as raw material.

The lectures will be broadcast by

the General Electric Co., from Station C. H. Y. C. After the lectures on fire prevention, Mr. H. J. Verneer will demonstrate a portable radio transmitting and receiving set, which can be utilised in the bush or on aeroplanes.

ARTICLE ON
CAN. COLLEGE
BY AUSTRIAN

Foreign Student's Impression
of University Life in
Canada

TORONTO
Sport is the Nation's Means
of Keeping Young

The Students' Council of this University has received a periodical from Austria, and many articles in it reflect the opinion of Continental students in our educational institutions. The following, written by an Austrian Professor, is an "explanation" of Toronto University, but is true of all Canadian colleges:

Toronto University
To explain the University of Toronto, would be to understand the spirit of Anglo-Canadian society. This sketch only tries to relate the outward appearances of things to their underlying causes.

The whole of society here is more of a definite type, steadier and richer in its fabric than is the case with us in Austria; and so too is the University.

There is one great difference. In society in Austria, as in her universities, there is more relation to abstract ideals (such as those of art and science) than to practical every day life, as is the case here. We Austrians have more relation to the intellectual side of things, a relation which today gives strength to our life; but we, unfortunately, are not paying back in any measure what we receive. Here in Canada, the "soul" is only now taking shape. There is a struggle towards it going on, which arises from the struggle for culture itself. It is in harmony with the specific English mind, and its many variations which colonial life here brings to the surface.

The purpose of this effort is a longing for art, for beauty of form, and also for a higher valuation of life than hitherto. This presupposes, as was once the case with us in Europe, a certain indifference towards one's daily bread, and a sense of connection between the past and the promise of youth.

One finds this movement within the walls of the university here. First of all, who are its members? Citizens, students, teachers. Its origin is the student, and not the teacher. The need of assuring proper education for a certain number resulted in the singling out of some from the general run of society, and leading them to devote their lives to this aim. A number of citizens founded the university. Thus it did not arise, as with us, from an association of professors (e.g. Padua, Sorbonne). It is first of all a high school, not an institute of research; and scientific research goes on for the most part outside its walls.

A student's work consists of lectures, experimental (practical) work, similar to our "seminars," but different in their taking up a greater part of the students' time, and in their greater importance. The professors (teachers) are divided into lecturers and tutors. Both stand in closest connection with their students. A result of this is that the teacher has far less time for his own research work. From our point of view this arrangement is a disadvantage: from the English one, an advantage. The general standard among the teachers is a little lower than with us but all the students are more thoroughly and equally prepared. Besides there are hundreds of possibilities for further study and work. The lecturers speak more freely than do our own, and give a plan and principle for acquiring knowledge. With the tutor's help, the student makes use of this, and gains self-dependence. This ideal, common to all universities, is carried into effect here in Toronto.

The students are a reproduction of the early Anglo-Saxon times; besides the representatives of the Northern nations, there are Irishmen and Scotsmen. They are strong, healthy people with sound instincts, and are secure against the deeper problems of life. The spirit of the old long past days breaks through them, and (for this end they have been educated) the ideals of present day society, fortified by youthful strength and without the maturity of business. They have many qualities in common with the Greeks. Anyone seeing them coming back from the Stadium, or any other of the many university sports fields, to attend a debate in the Convocation Hall, would at once be reminded of the youth of ancient times. Like those of old, they too have a strong social sense.

This leads me to mention citizens as members of the university. As they through education prepared the boy, so too they influence the young man to carry their ideal into effect. They desire them to become as they themselves are, (that sense of continuity, after which each living thing strives) or something more, and towards this purpose all the inherent power of youth is bent. The good citizen provides the form for the community life of the student, but nothing more; in this he is very generous. Heart House, for example, is a very (Continued on Page Four)

PRACTISE HOURS
Lively Competition is Anticipated

The games in this league will start today in accordance with the schedule listed below.

The teams have been divided up into the following groups:

- Group No. 1
Arts '24
Comm '27
Dent '26
Med '29
- Group No. 2
Sci '26
Med '25
Arts '27
Dent '27
- Group No. 3
Sci '27
Law '25 & '26
Comm '24
Arts '25
- Group No. 4
Med '27
Sci '24
Architecture
Med '26
- Group No. 5
Med '24
Sci '25
Comm '25
Dent '25
Arts '26

The games will be played on the point system, counting two pts. for a win and one for a draw. The teams will play off in their respective groups and the winners of the groups will play off at the end of the series for the championship, carrying with it the right to hold the Cappel Trophy for the year. This system has been accepted over the old one in order to provide more games for each team, there will therefore be no All-Star League.

All games will be played on the Campus Rinks between the hours of 5.10 and 7.10.

The following is a schedule of the games:

- Jan 21 5.10 p.m. Arts '24 vs Com '27
- " 21 6.10 p.m. Sci '26 vs Med '25
- " 22 5.10 p.m. Sci '27 vs Law '25, 26

An Irishman seeing on the wharf, a fish of unusual size looked at it for a few moments and then turning to a bystander, remarked: "The man that caught that fish is a liar."

At the Labour Secretary's Office
"Do you go in for this period stuff?"
"No, I leave all that sort of thing to my stenographer."

BASKETBALL
GAME GOES
TO VARSITY

McGill Team Fights Hard
Throughout

SCORE 33-25
Little and Manson Star for
"Red and White"

The Toronto Varsity senior basketball team defeated McGill in the opening game of the intercollegiate series by the score of 33-25. The game took place in the gymnasium of the M. A. A. A. on Saturday January 12th.

Long before the appointed hour for the game to start the gymnasium was packed to overflowing by a large crowd of enthusiastic spectators who had turned out to see the pride of Montreal's basketball teams do battle with the ever strong Toronto team. The crowd was entertained before the encounter by Glen Adney and his orchestra who rendered some popular songs to the delight of all present. Among the most interested spectators, occupying a front seat was Errol Anarson who had been elected captain of this years team but was kept out of the game on account of an accident received while playing in the States during the Christmas holidays.

The game commenced with a rush, both teams just insubduing by inches after pretty combination. Potter opened the scoring by converting two free throws. Little and Manson made the McGill hopes run high for they played well together. Little managed repeatedly to work in under the basket when he had little difficulty in making the passes which he received count for points. Varsity's defense tightened up and during the latter part of the first half and throughout the second half McGill had to resort to shooting from well out. Little and Manson especially pleased the crowd with great shots and it was largely due to their accurate shooting that McGill was holding its own with the strong Blue and White forward line composed of Potter, Hutchinson and Laidman. Half time arrived with McGill four points behind Varsity who had nineteen points to their credit.

The second half was very exciting throughout. Varsity widened the gap between the two scores but McGill almost immediately came back when Little, Manson and Mendelsohn each scored and were outlasting Varsity in their combination. Time out was called by the Varsity captain in order to steady down his men. This was close to the end of the game and the crowd yelled itself hoarse when Little made another two points. But victory was to be denied for Laidman sent the ball whirling through the twine twice in quick succession and Potter added another shortly after, while McGill had decided misfortune in their efforts to score, shot after shot hitting the ring enabling the Blue and White defense men to get the ball out of danger again. The game ended with a well earned victory for the Queen City players.

For McGill Little and Manson played a stellar game. Both players combined well and secured 22 of the 25 points which McGill earned. Quackenbush and Hilton played good but had a stiff proposition in the Blue and White forward line.

Toronto were, as far as scoring goes, best served by Potter but combination by the Varsity team came to grief when he got possession of the ball. However, he deserves much credit for, he scored no less than nineteen points by his almost perfect shooting.

The game was handled in a masterly fashion by P. S. Manley. He stands for no infringement of the rules and even the regulation calling for a horn to be used by the timekeepers was enforced much to the amusement of the crowd.

The line up was as follows:—

- McGill Centre
Manson Hutchison
R. Forward
Little Potter
L. Forward
Mendelsohn Laidman
R. Guard
Quackenbush Caple
L. Guard
Hilton Bell
Subs
James Burgess
Blumenstein Smith
Brown

Varsity Wont

The fast Barsity sextette who made such a good showing against McGill last week repeated their performance when they beat the Limestone City six 7-0 at home Saturday night.

The game was slow, the Toronto Forward men proving too strong for the tri colour. The game was aided as the score indicates.

DR. A. S. EVE LECTURES
TO GRADUATES

(Continued from Page One)
extension courses in physics, chemistry, electricity, engineering and possibly aviation would be exceedingly valuable.

In Dr. J. Roberts' report as deputy examiner, it was stated that 101 O.C.I. students tried McGill matriculation last summer. Later Dr. Small added the information that eight had passed, drawing attention to this anomaly when junior matriculation standing was accepted by McGill.

When Dr. Eve had concluded his address, Dr. H. M. Ami moved an eloquent vote of thanks. Mr. Ross added his tribute to the distinguished lecturer, saying that he had opened a new world to his audience.

An expression of regret at the death of Dr. T. D. Davies, cofounder of McGill, a graduate of McGill, who sent four sons to the same university, was moved by Dr. J. T. Baskien.

Hon. J. H. King, Minister of Public Works, a McGill Graduate, spoke briefly. At the conclusion refreshments were served under the convener'ship of Miss Anna Smillie.

The officers elected follow:
Honorary president, P. D. Ross, L.L.D., science '78; honorary vice-presidents, Dr. R. H. W. Powell, medicine '76; Judge P. B. Mignault, L.L.D., law '78; Dr. H. M. Ami, Arts '82; president, Mr. J. B. Mellan, science '88; first vice-president Dr. J. T. Baskien, medicine '95; second vice-president, Mrs. J. E. Craig, Arts '00; third vice-president Mr. R. de B. Corriveau, science '01; honorary secretary-treasurer, Robert G. Berry, science '13; associate secretary, Miss A. E. Smillie, Arts '05; executive, M. M. Cameron, science '02; Col. S. H. Osler, C.M.G., science '04; P. D. Wilson, Law '10; Miss Mary Macoun, Arts '15; Dr. N. M. Gulu, medicine '16; representative to Graduates' Society, Senator G. V. White, science '01; deputy examiner, J. A. Robert, science '84.

Dr. Eve's address, though almost entirely in that realm of science which concerns the atom, was of keen interest to the veriest layman, partly because of the piquant manner of presentation, and still more on account of the simplicity of the address. He announced that Sir Ernest Rutherford would be in Canada next August, when the British Association meets in Toronto.

Sir Ernest was born in 1871 in New Zealand where he obtained his school and university education. He was awarded one of the famous scholarships endowed with the profits of the 1851 exhibition in London. He proceeded to Cambridge University and worked in the Cavendish Laboratory under Sir Joseph Thomson. There he made his initial discovery in the detection of radio waves for a distance of about half a mile, using a magnetic detector which was afterwards developed by Marconi and extensively used on board ship.

About this time the discovery of Roentgen rays threw vivid light on the method by which electricity passes through any gas, including the air. The little charged carriers of electricity called "ions" were investigated with enthusiasm by the Cambridge school of physicists and remarkable progress in the understanding of the properties of electricity was thereby made, and in this work Rutherford took a prominent part.

Not long after, a notable physicist, Becquerel, discovered the radioactive properties of the element Uranium and as a sequel to this, Madame Curie extracted from pitchblende both polonium and radium. These discoveries attracted the attention of Rutherford at McGill and he immediately attacked the problem with vigor, in conjunction with Professor Soddy who had recently joined him from Oxford. They formulated the theory of radioactive changes which states that certain atoms disintegrate or explode, thereby changing from one type of atom to a new type of atom, emitting radiations in the process. This new theory had initially a hostile reception at the hands of many notable scientific men. It has, however, been completely vindicated and the known radioactive elements now exceed forty in number. In 1908 Rutherford was awarded the Nobel prize for chemistry.

Sir Ernest was at McGill University from 1898 to 1907, when he accepted a professorship at Manchester University, England. There he effected the notable achievement of detecting individual alpha-particles, which are really the nuclei of helium atoms, projected one by one into the ionization chamber.

At present he occupies the chair of physics at the Cavendish Laboratory, Cambridge, surrounded by a brilliant group of young research students who are making remarkable progress at the solution of many problems of outstanding importance. In particular, Rutherford has, by the projection of the alpha-particles, succeeded in the disintegration of elements, breaking up a light atom such as nitrogen, so that another element, hydrogen, is ejected from its inner citadel, thus realizing in a measure the ancient dream of the alchemists. In order to secure fundamental results of the character mentioned, concluded Dr. Eve, "it is necessary for an investigator to have not merely the essential scientific training; but to add thereto something of the imagination of a poet, in fact one

WICKSTEED
GYMNASIUM
COMPETITION

Test of All Round Athletic
Ability

FEB. 23rd.
Trials for Intercollegiate Gymnastic Team

On Feb. 23rd, the Wicksteed Gymnasium Competition will be held at the Montreal High School. This event offers a better opportunity for men to display all round athletic ability than any other event on the University athletic programme. The events will follow the same general lines as last year.

In order that all may have equal chances of winning the competition is divided into three sections:

- (1) Students of Graduating year, the winner to be awarded the Wicksteed Silver Medal and small plain "M".
- (2) Students of second and third years, the winner to be awarded the Wicksteed bronze medal and small plain "M".
- (3) Students of first year, the winner to be awarded the Dr. F. W. Harvey Cup.

The object of this test is to promote all round physical efficiency. The programme consists of a few simple dance steps and a short drill, as well as several events, all of which will be familiar to the men before the competition.

Practice periods for both the Wicksteed and Intercollegiate competitions are being held on Tuesday, Wednesday and Fridays at 5 P.M. to 6 P.M. at the High School Gymnasium. Any man who has any interest in or ability for gymnastics or indoor athletics is invited to turn out to these practices when some one will be present to coach and give assistance.

The Wicksteed Competition will serve as a trial for those trying to make the Intercollegiate team, and for this reason should see a large entry. The set movements will be published in a day or so, so that ample time may be devoted to practice.

A SLIGHT CHANGE

How would you like to change your daughter into a son—speaking of the future of course?

This was only one of the hundreds of strutting questions discussed and demonstrated at the seventy-fifth annual convention of the American Association for the Advancement of Science, which closed a one-week session today. More than 3000 educators attended.

Research workers and private savants startled the whole country with some of their scientific disclosures of the past year at their meetings during the week in the classrooms and laboratories of the University of Cincinnati.

The phenomenon of sex reversal, which was demonstrated in pigeons by Dr. Oscar Riddle of the research staff of Carnegie Station for Experimental Evolution, was one of the many outstanding features of the convention. Dr. Riddle told the extraordinary story of an egg-laying female dove that was completely changed into a male bird through a tubercular infection. He pointed out that this was common in pigeons, and said that it was entirely within the bounds of possibility for man, by artificial means, to produce the same result in human babies. He will henceforth confine himself to a thorough research of this problem, and predicted that some day human children may come made to order as far as their sex is concerned.

Many persons will be glad to learn that man is not descended from the ape, but from some primate of the ape family, according to Dr. Ales Hrdlicka, the noted anthropologist. "Evolution is a reality, a fact. It would be a sad affair if we had to take ourselves as the last word in the development of man. We are ascending to a future still less animal and more human," he said.

Dr. T. C. Chamberlin, a geologist from the University of Chicago, assured members of the convention in no uncertain terms that the world is not coming to an end, as many people would have us believe.

"Don't worry," he said heartily "the future changes and evolution of the earth alive for eons in the future speed as those of the past, and it took some ten billion years for the sun to form the earth into its present state, we may feel with some confidence that it will do its part to keep the earth alive for eons in the future not unlike those in the past."

Other phenomena too numerous to mention were explained and demonstrated at the convention. Dr. Charles D. Walcott, retiring president of the Association, may slightly modify a quotation from the essay on Shelley by Francis Thompson and apply his words to Rutherford "the universe is his playground, he runs riot through the ether, he chases the flying atom," and indeed to him the unseen path is as an open road.

association, when asked the question, "Why science?" replied:
"To enrich and ennoble human life; to disclose the wondrous laws of nature so they may be used to serve mankind; to disclose the beauties of nature, of man, and of art, and add to the joy of existence."
—Ohio State Lantern.

SMILE

"Listen to the Exhortation of the Dawn.
Look to the Day,
For it is Life, the very life of life, in its brief course lie all the virtues And Realities of your Existence, The bliss of Truth, the glory of Action The splendor of Beauty
For yesterday is but a dream And to-morrow is only a vision, But To-day,

Well lived, makes every yesterday
A dream of happiness
And every To-morrow a vision of Hope
Look well, therefore, to the Day,
Such is the Salutation of the Dawn."
From the Sanskrit.

EXTENSION COURSES IN MUSIC VALUE

Thirteen Illustrated Lectures
Will be Given

DR. PERRIN

Course is Open to the Public,
Ladies and Gentlemen

A course of extension lectures on the appreciation of music will be given in the Conservatorium of Music, 525 Sherbrooke St. West, commencing today January 21st at 5.15 p.m. The course will be open to the public both ladies and gentlemen.

Dr. Perrin, Dean of the Faculty of Music, whose ability is well-known to the public, will be the lecturer.

The topics of the lectures will be as follows, and will be illustrated either pictorially (by lantern slides) or musically.

Two lectures on Polyphonic Vocal Music with explanations and illustrations of the Catch, Round, Canon, Minuet and Madrigal. Three lectures on Polyphonic Instrumental (Canon and Fugue, Choral Variations etc.). Three lectures on the Suite, Symphony, and Sonata (as exemplified in the works of Corelli, Handel, Mozart, Haydn and Beethoven). Three lectures on Music since Beethoven. Two lectures on National Music.

The fee for the course is \$5.00 and should be paid to the Bursar of the University before January 21st. A ticket for the course will be issued in return.

HISTORICAL CLUB TO MEET AT 8 P.M.

(Continued from Page One)

Colby was Kingsford Professor of History at McGill for many years prior to the appointment of Professor Basil Williams to the chair of History. Prof. Colby left the academic world to become President of the Noiseless Typewriter Company of New York. Owing to press of business, Dr. Colby may not be able to reach Montreal to-morrow, but in the event of his absence, Mrs. Colby has very graciously offered to receive the members of the Club.

met at the residence of Dr. Colby, the first Honorary President. It is hoped that all members of the Club, active and honorary, will take advantage of this delightful opportunity, and will come prepared to contribute to the debate.

DR. A. S. EVE LECTURES TO GRADUATES

(Continued from Page 3)

large building containing every conceivable means necessary for sport and for social life. A description of the whole would be as useless to a European student as one of Utopia. The reality of it is unparalleled, and yet the idea will be found in all universities. Sport, I leave aside; it is the nation's means of keeping young, and is followed by all students with enthusiasm. In comparison with Austria it seems greatly overdone, but it is not a special end in itself.

An editorial in the same paper praises Canadian Students because they "listen to criticism."

In the October number of the "The Intercollegian," a student magazine regularly read in all the colleges and universities of America, there appeared an article from the pen of Dr. Herbert Gray, a visitor from Britain who had spent some months in the American colleges. This article contained several very outspoken and even severe criticisms of students, and of university education in America. The fact is cited here, not in order to repeat the criticisms, but in order to point out to that students in America are ready to listen to criticism. It is a good sign. Students, above all other classes of people are apt to consider themselves very fine fellows, as well as very well educated fellows. It is absolutely necessary at times that students should see themselves as others see them, and we would commend this objectiveness of mind to students everywhere.

She (back from honeymoon in Switzerland) — Don't you remember that wonderful gorge in the Alps, dear?

He—Sure do. It was the squarest meal I ever had.

McGILL MUST WIN ASSAULT-AT-ARMS

Every Man Asked to Turn
Out for B. W. and F.

The Boxing, Wrestling and Fencing Assault-at-arms is no less than a month away. It will take place on February 15th and 16th. It is held in rotation at Toronto, Queens and McGill. This year McGill's athletes will compete with those from Toronto and Queens at home.

Last year the meet was won by McGill for the first time since before war.

McGill must work hard to retain the honours which her representatives won last year.

The wrestlers under their veteran coach Mr. Smith are working hard and give promise of producing as formidable an aggregation as walked out of the ring at Kingston last year with 6 out of a possible 8 points under their belts. All men who have wrestled at all are asked to turn out and provide the necessary varied opposition to give experience in different styles. The college finals will be held on the 8th and 9th of February when the final competitions will take place to decide who will compose the Intercollegiate Team.

In the boxing line, the call is being sent out for more men—McGill boxers turn out and win honours for your university.

Men are especially needed in the 160 lb 175lb and heavy weight classes.

Good chances to make the team are still open to men who have not turned out so far—who have any knowledge of boxing at all. The boxers last year won 5 out of 8 points, which is credible but which this year ought to be increased if the Intercollegiate title is to remain with McGill. Too much responsibility must not be laid upon the wrestlers. Now that exams are over let every boxer turn out and show his hand in the boxing game. New faces are wanted at the gym on Tuesdays and Thursdays at 5 p.m. The greater the number of men turning out for and taking part in the College Meet—the keener the competition will be for place on the team. Keen battling for berths on the team will produce a better team—a more experienced team—a team which will bring back the majority of the boxing points McGill. Coach Ernie Robinson is very zealous but is keenly disappointed in the results so far—especially in the

TWO OUTSIDE MEETS FOR McGILL GYM TEAM

The McGill gymnasium team will compete with the Westmount "Y" team on the 22nd, or the 23rd, of February. The exact date will be decided within the next few days. For this meet a team of ten or twelve men will be chosen from the gymnasium club. Work will start immediately in order to get these men into final shape for the contest.

On the 8th of March the Intercollegiate meet takes place. The best six men will be chosen as the team to uphold McGill. The work of the club has been progressing fairly well, although not much has been done during the past two weeks on account of mid-term exams.

It is expected that all the men will turn out tonight. A dozen, or so, men will be indefinitely chosen to represent McGill in the meet with Westmount "Y".

Today

Smile!
The world is blue enough
Without your feeling blue.

Smile!
There's not half joy enough
Unless you're happy too.

Smile!
The sun is always shining,
And there's work to do.

Smile!
This world may not be Heaven,
But then it's home to you."

number turning out for the heavier classes. He is willing to spend time freely from now on—any or every night with men who want more instruction for the good of the University team. He has the goods and is all too willing to disperse it.

Any man who has boxed before is earnestly requested to show up at the practices and make himself known to Coach "Ernie" who will gladly take him in charge.

The Fencers have moved to their new quarters in Strathcona Hall and this year it is hoped that such swordsmen will be developed who will retrieve the lost glory of the game and will be a factor in winning the Intercollegiate meet again for McGill.

MECHANICALS TO GO TO OTTAWA

Reduced Rates Through Kindness of Dr. Herdt

With the memories of the agonies, disappointments, surprises, reliefs and what not that the past week has left still fresh in the minds of the "Engineers" is with great feeling of expectation that the men of the "McGill Electrical Club" look forward to their trip to Ottawa which is expected to become a reality next Thursday night.

It is only through the kindness of Dr. Herdt in securing special transportation rates and accommodation, in securing admission to the electrical plants of Ottawa and Hull and in making practically all the arrangements that the trip has been made possible and that the total cost including parlor cars, sleeping accommodations and meals will be very little, if any, over \$8 per person.

The present arrangements are that a special car will be attached to one of the evening trains leaving next Thursday night for Ottawa and that the car will be left in the yards in Ottawa for the use of the members of the party during the night and the next day, returning Friday evening and that during the day, Friday, the men will be the guests of various electrical industries throughout the cities of Ottawa and Hull.

Dr. Herdt has requested that one special announcement be made namely, that the ticket money (\$5 per person) must be in the hands by tomorrow (Tuesday) so that he may be able to reserve accommodation. Arrangements have been made for the fourth year men to pay their money to Borden '24 and the third year men to Sharpe '25. It is very urgent that all who intend to go on this trip hand in their money at once to these men.

NOTICE

A group photograph of the members of the Wesleyan Theological Society will be taken at Notman's Studio, Peel Street, on Wednesday, the 23rd inst. at 1.30 p.m.

All members are requested to be present.
